BBSQ Foreword

This national standard is identical with the English version of International Standard ISO 17007:2009, **Conformity assessment – Guidance for drafting normative documents suitable for use for conformity assessment**. The national committee responsible for reviewing this standard is Technical Committee 13 *Conformity Assessment*. This standard contains requirements that are relevant for The Bahamas.

BBSQ Committee Representation

This ISO International Standard was adopted as a National Standard under the supervision of the National Technical Committee for Conformity Assessment (NTC 13) hosted by the Bahamas Bureau of Standards and Quality which at the time comprised the following members:

Member	Representing
Dr. Ismae Whyms (Chairperson)	Princess Margaret Hospital
Mr. Raymond Baillou (Vice Chairman)	QALS Partners
Mr. Lindy Hall (Technical Secretary)	Ministry of Works
Mr. Nathaniel E. Lloyd (Technical Secretary)	Royal Bahamas Police Force Forensic Lab Biology Unit
Ms. Bria Dean (Recording Secretary)	Antiquities and Museums Corporation
Ms. Patrice Nairn (Recording Secretary)	Premier Clinical Lab
Mr. Brian B. Beneby	Water & Sewerage Corporation
Ms. Sybil Bullard	BAMT
Ms. Margaret Daxon	Diabetes Education on the Move
Ms. Deborah Deal	BCCEC
Ms. Bernadette Ellis	Health Professions Council
Dr. M. Anthony C. Frankson	University of the West Indies School of Clinical Medicine and Research Bahamas
Ms. Alexandra Hall	Higgs & Johnson
Dr. Raveenia Hanna	Bahamas Agriculture and Marine Science Institute
Dr. M. Isaacs	Department of Agriculture

Ms. Renee Johnson	Bahamian Touch Products
Ms. Tyrhonda Knowles	Department of Information Technology
Mr. Andre A. Moss	Sun Oil Engineering – Projects
Dr. Patrizia Pasini	N/A
Mrs. Erika Perpall	Department of Information Technology
Ms. Kendra Pratt	Department of Information Technology
Mr. Olsen J. Smith	Water & Sewerage Corporation
Ms. Jaime Strachan	Registrar General's Office
Ms. Avis Richardson	Food Technology and Safety Laboratory (FSTL)
Mr. Edwin Yuklow	Ministry of Works
Ms. Eunae Wright	Antiquities, Monuments and Museums Corporation – Accounts
Mrs. Veronica Ferguson	Royal Bahamas Police Force – Scientific Support Services
Ms. LoAnn Johnson	Department of Environmental Health
Mr. Wellington Ferguson	The National Insurance Board – Health and Safety Management

Foreword

ISO (the International Organization for Standardization) and IEC (the International Electrotechnical Commission) form the specialized system for worldwide standardization. National bodies that are members of ISO or IEC participate in the development of International Standards through technical committees established by the respective organization to deal with particular fields of technical activity. ISO and IEC technical committees collaborate in fields of mutual interest. Other international organizations, governmental and non-governmental, in liaison with ISO and IEC, also take part in the work. In the field of conformity assessment, the ISO Committee on conformity assessment (CASCO) is responsible for the development of International Standards and Guides.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

Draft International Standards are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

ISO/IEC 17007 was prepared by the ISO *Committee on conformity assessment* (CASCO).

It was circulated for voting to the national bodies of both ISO and IEC, and was approved by both organizations.

This first edition of ISO/IEC 17007 cancels and replaces ISO/IEC Guide 7:1994, of which it constitutes a technical revision.

Introduction

This International Standard provides principles and guidance on how to write normative documents, such as standards, technical specifications, codes of practice and regulations, such that they are concise and clear, especially in the context of any subsequent conformity assessment activity.

Conformity assessment activities include testing, inspection and various forms of certification. These activities can result in attestations such as declarations, reports, certificates, marks of conformity or the granting of permissions and licences (see also ISO/IEC 17000:2004).

This International Standard is intended for the following users:

- standards developers not applying the ISO/IEC Directives;
- industry associations and consortia;
- purchasers;
- regulators;
- consumers and non-government groups;
- accreditation bodies;
- conformity assessment bodies;
- conformity assessment scheme owners; and
- other interested parties, e.g. insurance organizations.

This International Standard is intended to assist the above users in developing specific normative documents at national, regional or international levels, both in regulated or non-regulated applications.

Users of this International Standard may also find useful the good standardization practices defined in the ISO/IEC Directives (which specify the requirements for ISO and IEC normative documents containing specified requirements) and the WTO Agreement on Technical Barriers to Trade, Annex 3, *Code of Good Practice for the Preparation, Adoption and Application of Standards*. The ISO/IEC Directives, Part 2, 2004, 6.7, also covers aspects for conformity assessment.

This International Standard also includes guidance on specialized International Standards and Guides in the domain of conformity assessment, known as the conformity assessment toolbox. These are principally the work of CASCO in cooperation with IEC. Reference to these generic publications is included to emphasise that they contain internationally agreed provisions covering conformity assessment activities. Reliance on such publications facilitates reproducibility and mutual acceptance of conformity assessment results around the world.

To make this International Standard easy to follow, technical terminology has been avoided as much as possible. However, in some cases, the use of some technical terminology has been unavoidable. For example, the requirements in normative documents can relate to many different areas, e.g. a particular material, product, service, installation, process, system, person or body. In a conformity assessment context, these are all examples of an “object of conformity assessment”. To avoid repeating a list of the examples throughout the text, the term “object of conformity assessment” is used, for which a definition is provided in Clause 3.

The guidance in this International Standard is subdivided into three clauses, as follows:

- Clause 4 specifies five principles as the basis for the subsequent guidance;
- Clause 5 provides guidance for the preparation of normative documents that specify requirements for characteristics of objects of conformity assessment;
- Clause 6 provides guidance for the preparation of normative documents specifying requirements for conformity assessment systems.

FOR REVIEW ONLY

Conformity assessment — Guidance for drafting normative documents suitable for use for conformity assessment

1 Scope

This International Standard provides principles and guidance for developing normative documents that contain:

- specified requirements for objects of conformity assessment to fulfil;
- specified requirements for conformity assessment systems that can be employed when demonstrating whether an object of conformity assessment fulfils specified requirements.

This International Standard is intended for use by standards developers not applying the ISO/IEC Directives, industry associations and consortia, purchasers, regulators, consumers and non-government groups, accreditation bodies, conformity assessment bodies, conformity assessment scheme owners, and other interested parties, such as insurance organizations.

2 Normative references

The following referenced documents are indispensable for the application of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

ISO/IEC 17000:2004, *Conformity assessment — Vocabulary and general principles*

3 Terms and definitions

For the purposes of this document, the terms and definitions given in ISO/IEC 17000:2004 and the following apply. For convenience of use, the following definitions are repeated.

3.1

conformity assessment system

rules, procedures and management for carrying out conformity assessment

NOTE Conformity assessment systems may be operated at international, regional, national or sub-national level.

[ISO/IEC 17000:2004, 2.7]

3.2

conformity assessment scheme

conformity assessment programme

conformity assessment system related to specified objects of conformity assessment, to which the same specified requirements, specific rules and procedures apply

NOTE Conformity assessment schemes may be operated at international, regional, national or sub-national level.

[ISO/IEC 17000:2004, 2.8]
